

Introductory Information

I decided to do my class project on first grade.

My classroom management philosophy will start out as teacher direct. I think it is very important for the students to come into a classroom and know who is boss and respect the teacher. If students come in and you give them complete control over the classroom it will be hard to get the control back. I think after students come back from winter break that the teacher can lean towards a more collaborative effort. They can do this by telling the students what they are going to learn but letting the students pick the way they want to learn about that subject.
