

Reasoning for Classroom

I designed my classroom this way because I am all about things having a flow to them. When students walk in the door they will go straight to their cubby, lunch chart, and work shelf. All those morning routines are right there on the left when they first come in so they can go straight in a line and then have a seat. I chose to sit them in groups. All the classes I have observed I think when students are grouped together they work better. Simple questions that if they were on their own they would have to disrupt class to ask they can ask someone sitting at their table. I put the word wall and math stuff at the big carpet because those are important things that we can all come together and work on and then after they can go back to their desk and work. I love the way I set up my desk in this design. I hope when I do become a teacher I will be able to set up my desk like that. I will definitely keep my desk neat. I think if you keep a messy work area then the kids will too. I was not too thrilled with my small group work area, but I do believe it is important to have one. There will be two garbage cans in my classroom. One on each side of the classroom. Usually, once you get to first grade, there are not bathrooms in the classrooms.
